

Nasser Alsarabi

Power Apps & Automation Developer

alsarabinasser47@gmail.com +971 558866504 Nasser-Alsarabi Romanian / Jordanian
 Dubai, UAE 15/04/2004 Sarabi-N

PROFILE

Business Information Technology graduate with a strong academic foundation in software development, data analysis, and IT systems. Experienced in academic projects, programming, and cloud fundamentals, with a proven ability to learn quickly, collaborate effectively, and adapt to new technologies. Motivated to contribute to professional environments while gaining hands-on experience and further developing practical skills.

EDUCATION

Bachelor's Degree in Business Information Technology

Princess Sumaya University for Technology
GPA: 3.2 (Very Good)

10/2022 – 01/2026
Amman, Jordan

PROFESSIONAL EXPERIENCE

National Energy Services Reunited Corp. (NESR)

Power Apps & Automation Developer

02/2026 – Present
Dubai, UAE

- Design, develop, and maintain scalable low-code business applications using Microsoft Power Apps
- Automate workflows and business processes using Microsoft Power Automate to improve efficiency
- Collaborate with stakeholders to gather requirements and translate business needs into technical solutions
- Integrate applications with data sources such as SharePoint, Dataverse, and external APIs
- Optimize existing processes by reducing manual tasks and improving accuracy through automation
- Apply best practices in governance, security, and performance for all solutions

LANGUAGES

Arabic

C2 – Native / Proficient

English

Advanced English – TOEFL 80/120

Romanian

C2 – Native / Proficient

SKILLS

Data Analysis

- Data Analysis with Python (Pandas and Matplotlib)
- Data Analysis with Power BI
- Data Visualization

Programming & Development

- Python, Java, C/C++, Dart
- HTML, CSS, JavaScript, React.js, Tailwind
- SQL, MySQL, Firebase, PostgreSQL
- Microsoft Power Apps & Automation

Soft Skills

- Time Management & Organization
- Team Collaboration & Communication
- Continuous Learning & Adaptability
- Analytical Thinking

PROJECTS

RedStone

09/2025 – 01/2026

Graduation Project

Redstone is an AI-driven smart SaaS/iPaaS solution that aims to facilitate the process of workflow automation to individuals and small to medium-sized teams as part of a workspace. Users can combine various applications, make intelligent workflows, and receive real time and AI-based optimization suggestions on one smooth interface.

The project is implemented in terms of the 3 capabilities:

- Flow Builder: Flow Builder is a node-based canvas that allows the user to create workflows without any technical knowledge.
- AI Assistant: A workflow assistant, which enables users to build, debug and optimize workflows with a natural language interface, both technical and nontechnical.
- AI Evaluation: A smart unit, which reports inefficiencies and detects the errors and performance issues, then also makes proposals on how to improve the performance of the ongoing working processes.
